

# Covid-19 data for Toronto

## 1. Introduction

Covid-19 has caused millions of deaths around the world and is still causing global economic problems around the world. Therefore, the aim of this project is to show the impact of Covid-19 on a single city. City of Toronto is chosen for this project.

## 2. Problem

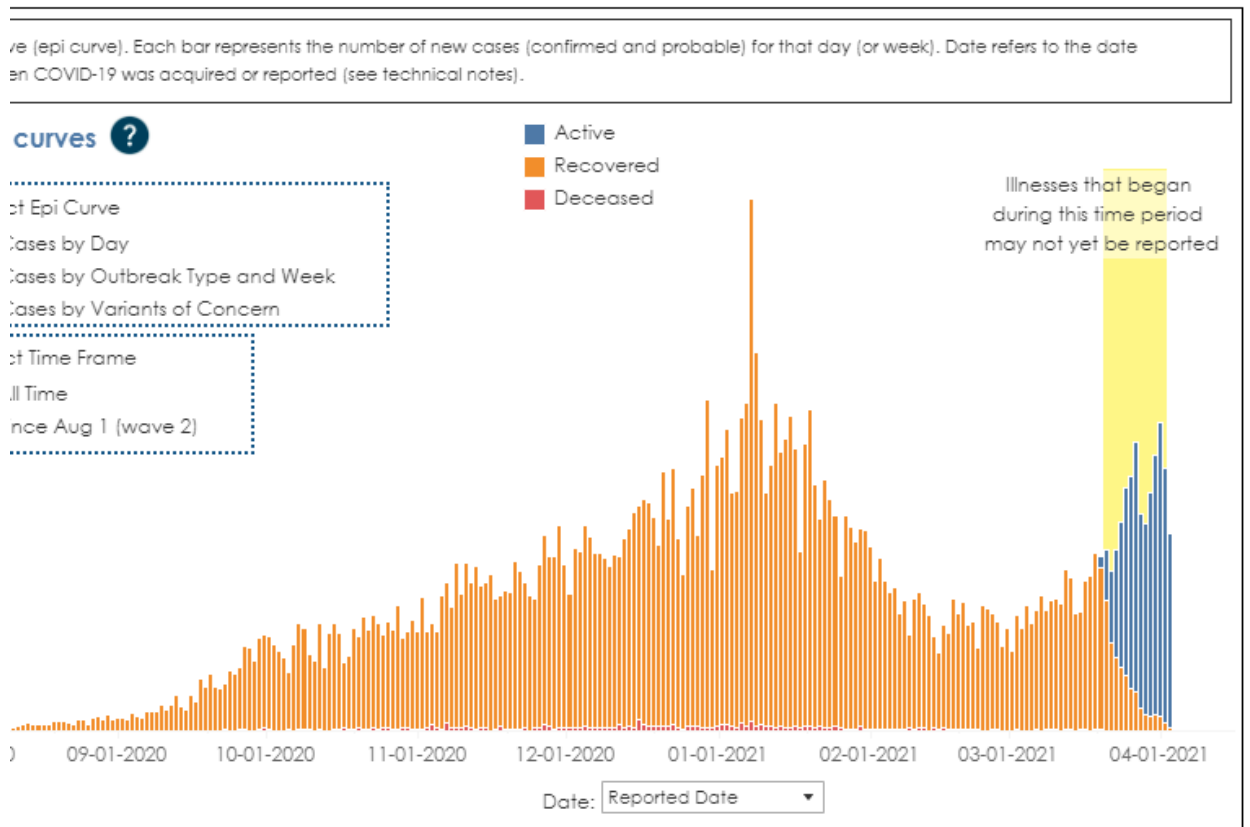

The intent of this project is to visualize the impact of Covid-19 on the city of Toronto. The number of infected people is displayed on the map depending on the district where the infection was registered.

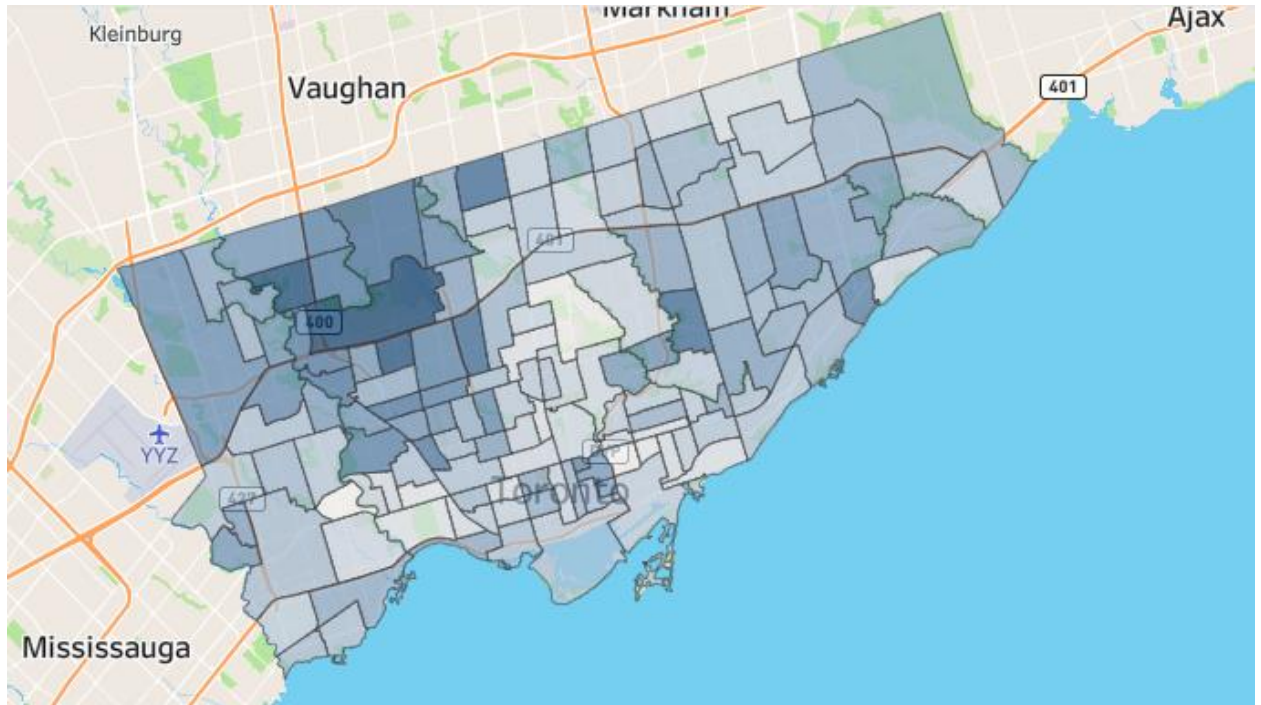

### 3. Data acquisition and cleaning

Data necessary for this project was acquired from official statistics for city of Toronto. It has been cleaned and processed according to the standard procedures.

### 4. Data visualization

## 5. Conclusion

As it can be seen from the maps, entire city was hit by the Covid-19 pandemic. Aside from numerous deaths, it has caused massive economic damage to its people.
